Staff Report: Barnes Butte Complex Focus Committee Update and Survey Results

Overview:

During the Barnes Butte Complex Workshop on 7/25/2017, Council requested that staff develop a citizen focus committee to understand the community's desire for the development of the property. Currently, over 30 members of the public are actively participating in the development of the site with the focus committee having officially met three times.

The focus committee developed the below survey that was active for the month of November. The City, County Health Department, Police Department and members of the focus committee shared the survey via social media sites. Over 330 people responded to the survey with the following results.

Land around Barnes Butte has recently been purchased by the City of Prineville. City Council wants to know what you want the land to be used for. The options below are examples of what people might want to see. We are not guaranteeing any activities will end up being on the property. We want to hear from the community about what is important to them.

Below is a list of comments received as part of the survey.

- Tennis courts - indoor and outdoor.
- Drive in movie theater
- Disc golf
- New race track and rodeo event grounds
- Pine Nursery Park in Bend would be a good example of some things to do with this park. A lighted outdoor sports complex could attract tournaments and other events to our community. Moab Utah has a great, NOT massive indoor/outdoor sports complex that would be a great example. Paved or just maintained bike/hike/running trails would be great as well and another fishing pond would be awesome, if someone took the time to do some maintenance around it for access or built a fishing pier
- Grape vineyard
- Leave the North side as natural as possible please.
- Keep the land as natural as possible, but have dirt and gravel trails. Community garden near the entrance with picnic and grassy area for family activities. Moses Lake Wa. has a huge ORV park that horse riders, bird watchers, atv use year round in relative harmony.
- Pool!
- How about a rec center with a new pool. Why does the city keep wasting money
- indoor aquatic center
- Better patrolled than during the test period
- Indoor community pool
- rock climbing practice walls
- ATV trails
- Informational kiosks.
- Swimming pool complex
- Pool. Scooter park
- natural/undeveloped areas
- Hi guys. I am wondering why a part of this property is not going to be designed as a 60 and older homes in a designated section ? I believe Prineville needs an area to make a safe place seniors can enjoy. Thanks Ron Powell
- ADA accessible trail with occasional benches at selected places that offer good birding and photography/art opportunities. No horses on the ADA/birding trail please. Also would like to see weeds controlled and native bunchgrass and forb communities reseeded and shrub habitat patches retained.
- disc golf course
- Please use the dog bag stations that are in the green space between the iron horse subdivisions! They are not being used! And we need them up at new the barnes butte area. If people have doggie poo bags they will use them! A dog park would be amazing! So many people in the subdivisions up here have dogs!! Camping would attract riff raff!! We don't want anything that would decrease the property values..
- Water wadding pool
- snow park, sledding Hill
- Pickleball
- OHV one way trails
- Motocross track... You could actually make money. No competition for over 100 miles...
- Outdoor science lab
- Dirt stock car track

- Parcel it and sell it, you have a housing crisis if you haven't noticed.
- Leave natural with trails, NO BIKES!
- Indoor heated pool for all por seniors with achy bones.
- A play area that makes it easy for parents to keep an eye on children and ensure their safety similar to the Northridge Park in prineville.
- A trap club. The one in Redmond has closed. You could put up sound walls to block any spound that might be heard in the neighborhoods.
- Water park
- Indoor swimming pool
- Playground area with track/trails around perimeter with good shade but also good visibility. Track or wide trail to allow for children to ride bikes side by side and allow for visibility (unlike bike path through town).
- Covered pool!
- Rock climbing
- outdoor bouldering park for adults. see:Jackson Hole outdoor bouldering park
- This is a survey?
- YMCA or Boys and Girls Club
- This would be a phenomenal venue for cyclocross bike racing. Good parking, greatness proximity to town, terrific lay of the land.
- Playground
- More indoor rec opportunities! Tennis, swimming, etc...
- Indoor pool
- Leave as is. No need to develop everything!!
- Disc golf course
- Please nothing with motorized vehicles, please!
- I feel this would be a great place to provide a non motorized recreational opportunity to people close to town. A view point at the top would be nice. If it was to be multi use trails please separate equestrian from other users. For a small parcel of land user conflict would be high. Equestrians need to have there own trails.
- build a road through it. that better be why you bought it!
- Indoor shooting range
- Affordable housing (homes and/or apartments)
- Single track mt biking trails like they have around Ashland. <http://www.ashlandtrails.org/maps/>
- Pickleball courts
- Peters to Combs Flat thruway
- Waterpark
- Future residential development expansion, within reason. Possibly only taking up a portion of the land, leaving the rest for recreation etc., think Pine Nursery Park in Bend.
- Residential housing as in the Plan
- rodeo/race grounds
- Something for children since the castle park is no longer safe
- Swimming pool
- leave corrals and set aside parking near them for horse trailer use to keep separate from other parking for safety.
- Sledding hill

Summary:

Please review the survey in preparation for a discussion regarding next steps for the site.
